# Getting Started with Google Colab

## 1. Search Google Colab using Google search

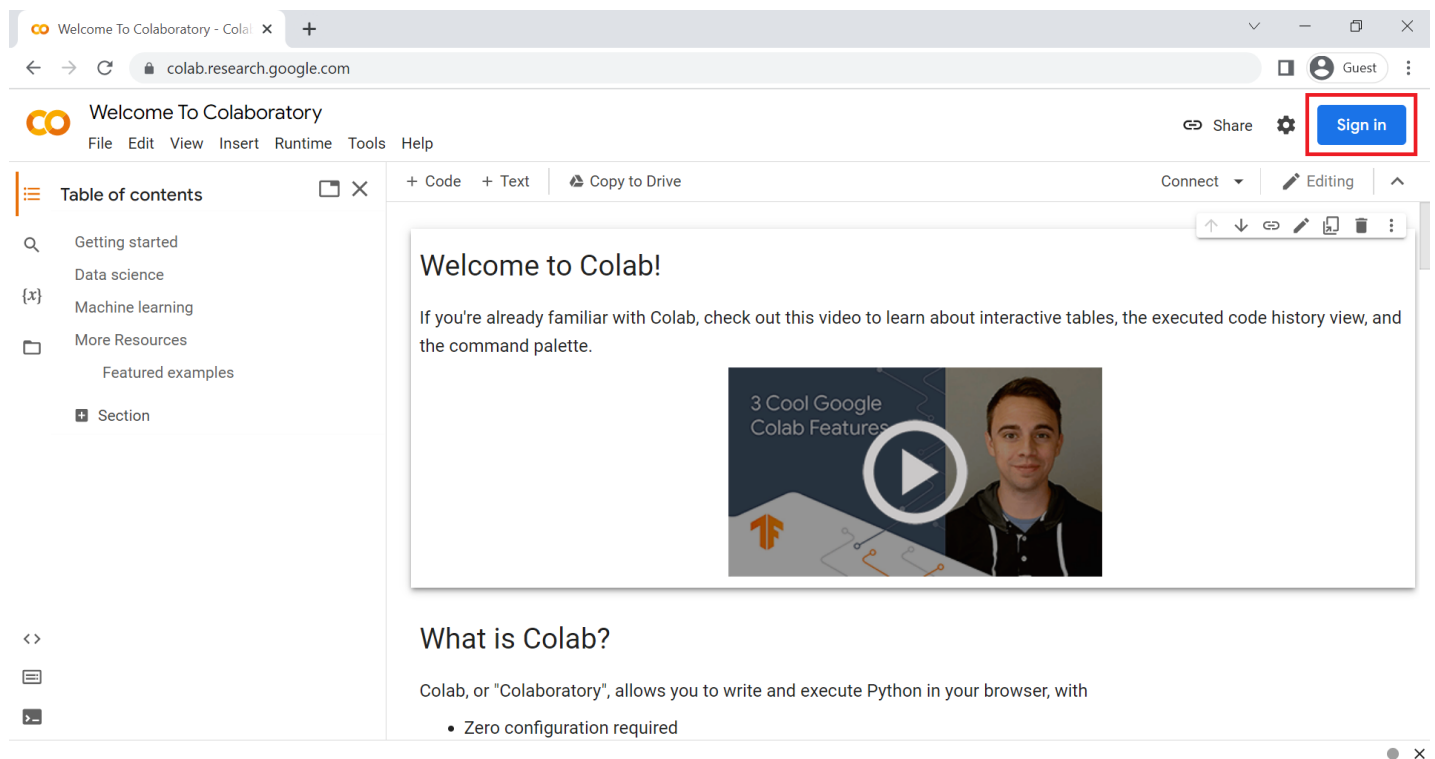

The screenshot shows a web browser window with the Google search engine. The search bar contains the text "Google Colab". Below the search bar, the search results are displayed. The first result is "Google Colab" with the URL "https://colab.research.google.com". Below this, there is a link to "Filter notebooks - Google Colab (Colaboratory)". The "People also ask" section is visible at the bottom of the search results, with questions like "What is Google Colab?", "How is Google colab free?", "Is Google colab a Python IDE?", and "Why should I use Google Colab?".

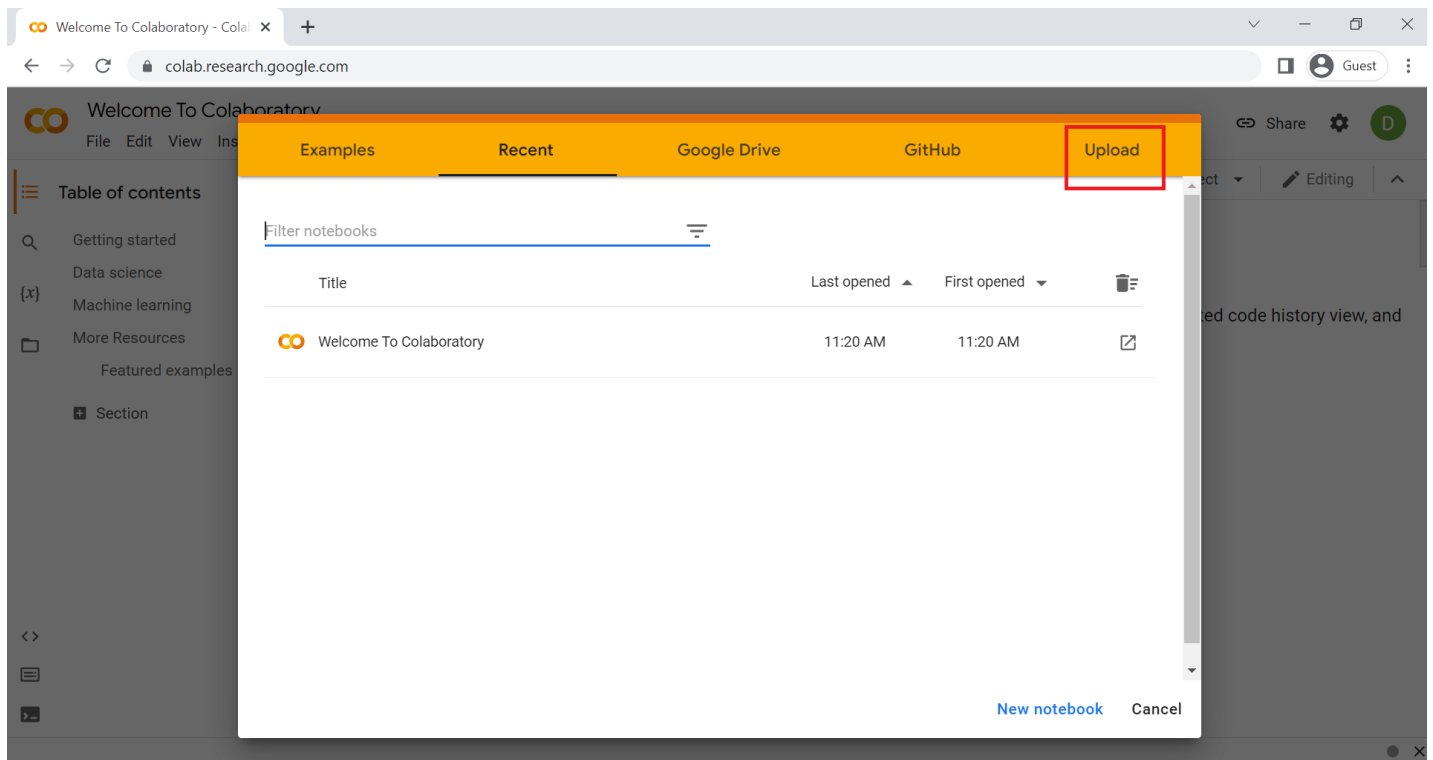

## 2. Click on the search result Google Colab

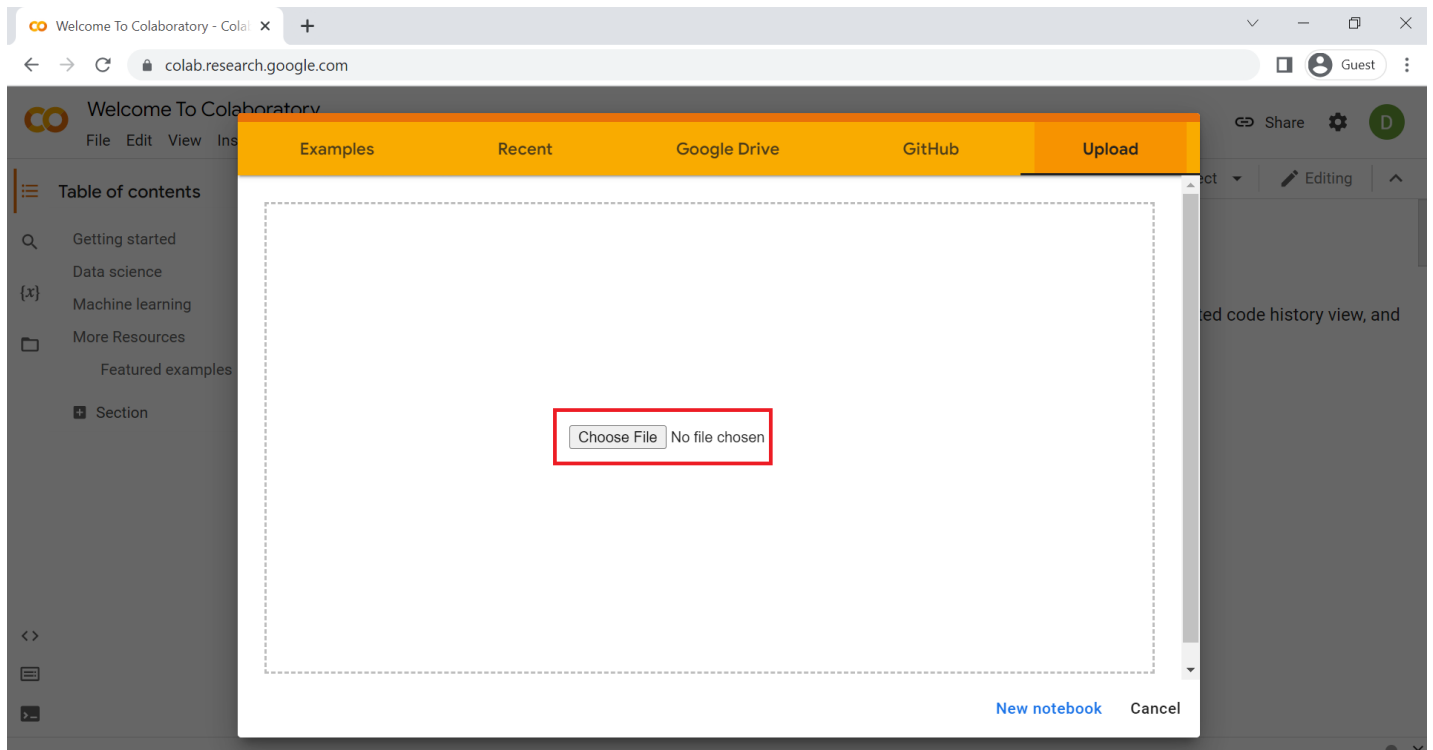

3. Click on the 'Sign-in' button so that you can sign in to Google Colab with your Google account and save your work from time to time

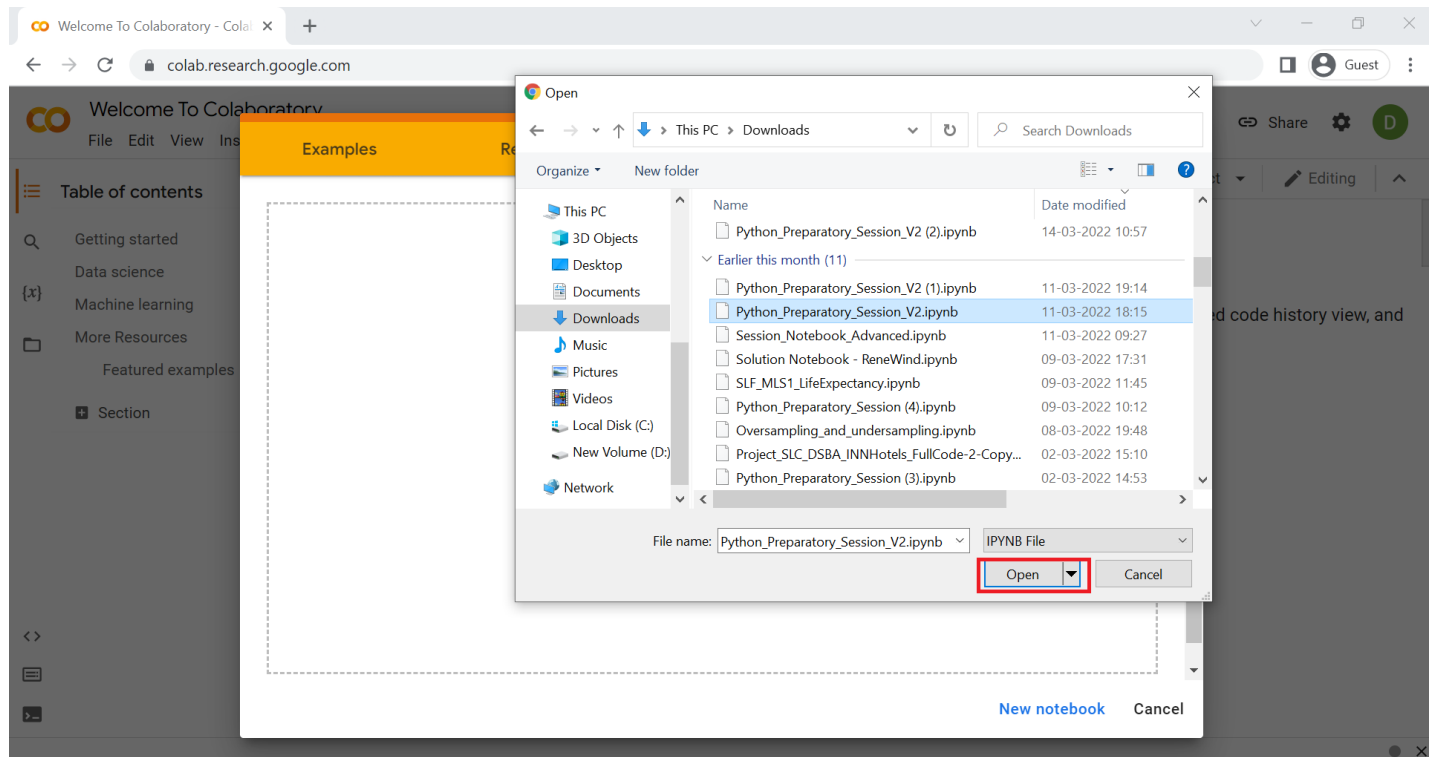

4. Click on 'Upload' to upload an existing Python notebook

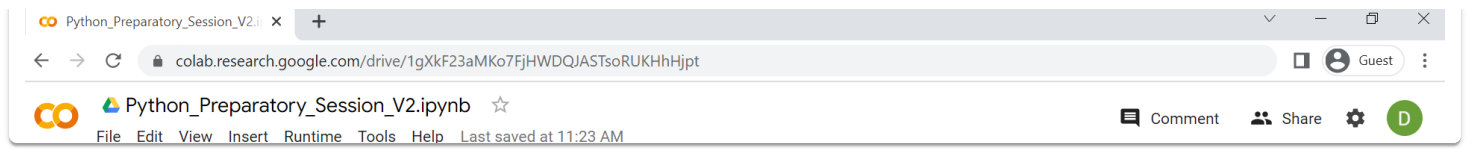

5. Click on the 'Choose File'. A new window will appear

6. Browse the Python notebook (.ipynb file) you want to open from your local machine and click on 'Open'

7. The Python notebook will get successfully opened in Google Colab. Now you are ready to work in Google Colab
