| 10 min | Session summary | <ul style="list-style-type: none">Summary of the sessionBrief about the next session |

Important points to note:

- We have observed in previous sessions that GridSearchCV can take a long time to run. Please avoid running the code for hyperparameter tuning during the session. You can use the pre-run notebook.
- Log in for your session 5 min before and make sure you are ready with all the material to be used for the session.
