## Project Discussion Forum

### Instructions

This is the Project discussion thread for the **Renewind** project of **Model Tuning**.

This discussion forum is open from **{25th January 2024 (Thursday) 2:30 PM GMT to 9th February 2024 (Friday) 6:29 PM GMT}** to help you with your project-related queries.

You can also use this forum, to discuss your approaches, and share roadblocks you face and discuss them amongst your peers.

Points to note :

Please feel free to raise any blockers or doubts that are preventing you from moving ahead with the project.

1. Please do **not** share your codes here as we do not want anyone to be biased by someone else's work.
2. For faster resolution, please make sure you mention the following points:
  - a. Error screenshot
  - b. Python version or any other technical details you want to mention
  - c. The steps that you have taken to resolve the issue and why you think it might still be occurring.
3. Please do not post general questions outside the scope of the project.
4. Please maintain the professional decorum of the forum.
5. The response time is 12-24 hours on weekdays.
6. Queries hinting towards or giving away the solution will be removed from the forum.

Please refer to the following links for frequently asked questions to make sure that your question is not already answered:

Content FAQs: [Week-1](#), [Week-2](#)

The image shows a screenshot of the TinyMCE web-based rich text editor. At the top, there is a horizontal toolbar divided into several sections by vertical lines. The first section contains the word "Paragraph" followed by a downward arrow. The second section includes bold (B), italic (I), strikethrough (ABC), underline (A), a color picker icon, and another downward arrow. The third section features alignment options: left, center, right, and justified. The fourth section contains bulleted list, numbered list, decrease indent, increase indent, and link icons. The fifth section has undo, redo, insert link, insert video, source code, subscript (x²), superscript (x₂), Greek letter Omega (Ω), font size (12pt), a dropdown arrow, and a spellchecker icon (abc). Below the toolbar is a large, empty rectangular text area. At the bottom of the interface, a status bar displays "P" on the left, "0 WORDS" in the center, and "POWERED BY TINY" on the right.
