Guide for Jupyter Notebook

The Jupyter Notebook Toolbar looks like -

- **File**: It will show a list of options like 'Save', 'Save as', 'New', 'Make a copy', 'Download as' etc.
  The 'Download as' option will show options to download the current notebook in different formats like HTML, PDF, etc.

- **Edit**: It will show Cut, Copy, Paste, Delete, Move Up, Move Down, etc. for Cells.
  Cells here refer to the fields where the code is written. (Area marked in Red in the following image)

- **Cell**: It will show 'Run Cell', 'Run All', etc. options.

- **Kernel**: When your notebook hangs or is in an endless loop (while loop)- you can click on Kernel and 'Interrupt', 'Restart' the Python Kernel.

| 💾 | + | ✂ | ⎘ | 📋 | ↑ | ↓ | ▶ Run | ■ | C | ⏩ | Markdown ▼ | ⌨ |

🖫 Button or "CTRL + S" saves the notebook changes

⊞ Button add a new cell below.

✂ Button cuts the cell selected

⎘ Button copies the selected cell

↑ arrow moves the selected cell upward

↓ arrow moves the selected cell downward

▶ Run Button runs the selected cell

■ Button Interrupts the kernel or stops the operation

C Button restarts the kernel

⏩ Button restarts the kernel and runs all the cells
